

VERSION MARKED TO SHOW CHANGES MADE

Please amend the following claims:

14. (amended) A method for manipulating a customer image corresponding to a customer, the method comprising:

capturing the customer image;

generating a composite image comprising the customer image and one of at least one apparel style image corresponding to a potential purchase item; [and]

displaying the composite image thereby allowing the customer to assess the potential purchase item without having to try it on[.] ; and

storing the customer image.

wherein the step of generating the composite image further comprises retrieving the customer image in response to a request for the composite image.

Please cancel claim 15.

Please add the following claim:

21. The method of claim 14, wherein the step of displaying further comprises:

detecting a presence of a person near a display;

determining that the person does not correspond to the customer image; and

informing the person about a subsequent action in response to the step of determining.
